

Clergate Public School

Works notification | 13 March 2025

Dear staff, parents and carers,

Drinking water quality testing was recently conducted at Clergate Public School as part of our routine water testing program.

Findings have detected traces of bacteria in samples collected from the water tank and copper in samples collected from the Building A bubbler.

Access has been restricted, and signage has been installed to remind students and staff not to use the affected outlets.

The school has been provided with hand sanitiser for handwashing.

Cleaning of the water tank and filtration system was completed by qualified and licenced contractors on Tuesday 11 March 2025 under the guidance of an independent hygienist.

The independent hygienist will re-test the outlets to ensure the water meets the requirements of the [Australian Drinking Water Guidelines](#).

Please see a healthcare professional if you have any concerns or visit Western HSW Local Health District for advice.

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
