

Penrose Public School

Works notification | 16 June 2025

Dear staff, parents and carers,

Further to the works notification that was shared with the community on [24 March 2025](#) regarding the drinking water quality tests results for Penrose Public School, remediation work is continuing. Work is being undertaken by a qualified and accredited tradesperson, following advice provided by an independent hygienist.

Handwashing sink tap in Building G

Re-testing of the impacted tap outlet in the library sink in Building G has detected exceedances in copper and lead. The re-testing was undertaken by an independent hygienist.

As a precautionary safety measure, access to the tap outlets in the library will continue to be restricted. Signage is in place to remind students and staff not to access the tap. We are working with an independent hygienist to undertake the further plumbing remediation work required.

All work will be carried out by qualified contractors, and we will undertake additional testing at the school following the work to ensure the water can continue to be used.

Bubblers outside the toilets in Building D

Re-testing of the bubblers outside the toilets in Building D by an independent hygienist has returned results which meet the requirements of the Australian Drinking Water Guidelines.

Access to the bubblers has been restored and can continue to be used by students and staff.

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
