

The Pocket Public School

Works notification | 27 June 2024

Dear staff, parents and carers,

Drinking water quality testing was recently conducted at The Pocket Public School as part of our routine water testing program.

Findings have detected bacteria in samples collected from the tap outlets located in the disabled toilet in Building H and the staff kitchen in Building E.

As a precautionary safety measure, access has been restricted to the tap and we are working with an independent hygienist to undertake any remediation work required.

All work will be carried out by qualified contractors, and we will undertake additional testing at the school following the work to ensure the water can continue to be used.

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
