

Quambone Public School

Works notification | 13 June 2024

Dear staff, parents and carers,

Drinking water quality testing was recently conducted at Quambone Public School as part of our routine water testing program.

Findings from the samples collected have detected bacteria in the water tank outlet, bacteria and lead in the bubblers located at Building B, and copper and lead in the water tank outlet located at the residence.

As a precautionary safety measure, access has been restricted to the outlets and signage is in place to remind students and staff not to access the outlet. Bottled water is being supplied as an alternative for students and staff as required. We are working with an independent hygienist to undertake any remediation work required.

All work will be carried out by qualified contractors, and we will undertake additional testing at the school following the work to ensure the water is safe for use. We will provide an update once we have confirmation of the details of this work.

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
