

Rappville Public School

Works notification | 18 March 2025

Dear staff, parents and carers,

Drinking water quality testing was recently conducted at Rappville Public School as part of our routine water testing program.

Findings have detected traces of bacteria in samples collected from tap outlets in the boys' toilets and an external tap on the western side of Building A.

Access has been restricted and signage has been installed to remind students and staff not to use the affected tap outlets.

The school has been provided with hand sanitiser for handwashing in these toilets.

All other water outlets remain accessible.

We are working with an independent hygienist to undertake the required remediation work.

Work started on Thursday 13 March 2025 and is being carried out by qualified and licenced contractors.

When work is complete, the independent hygienist will re-test the outlets to ensure the water meets the requirements of the [Australian Drinking Water Guidelines](#).

The health, safety and wellbeing of the school and the local community is our highest priority.

Please see a healthcare professional if you have any concerns, or contact [your local NSW Health Public Health Unit](#) for advice on 1300 066 055.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
