

# Red Range Public School

## Works notification | 20 February 2025

Dear staff, parents and carers,

Drinking water quality testing was recently conducted at Red Range Public School as part of our routine water testing program.

Findings have detected traces of bacteria in samples collected from tap outlets in the Building C boys toilet handwashing tap.

Findings have also detected traces of copper in samples collected from tap outlets in the Building A sick bay handwashing tap.

Access has been restricted to these taps with lockable ball valves and signage has been installed to remind students and staff not to use the affected tap outlets.

The school has been provided with hand sanitiser for handwashing.

We are working with a water filtration contractor to undertake the required remediation work.

When work is complete, the independent hygienist will re-test the outlets to ensure the water meets the requirements of the [Australian Drinking Water Guidelines](#).

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
