

# The Risk Public School

## Works notification | 3 July 2025

Dear staff, parents and carers,

Further to the [works notification from Autumn 2025](#) regarding the drinking water quality test results for The Risk Public School, remediation work has been completed by a qualified and accredited tradesperson following advice provided by an independent hygienist.

Re-testing of the affected tap outlets by an independent hygienist has returned results which meet the requirements of the [Australian Drinking Water Guidelines](#).

Access to the tap outlets in the following locations has been restored and can be used again by students and staff:

- the sink in the practical activities area in Building D
- the bubbler outlets in Building B.

The garden tap outside Building D, which was not designed for drinking, should only be used for watering plants. A “Do not drink” sign above it is placed as a reminder.

The health and wellbeing of students, staff and the local community is our highest priority.

Thank you for your cooperation during this important work.
