

Robertson Public School

Works notification | 25 September 2026

Dear staff, parents and carers,

We are providing an update on the ongoing management of structural issues, mould and water leaks at Robertson Public School.

Following our update in [early-September 2026](#) we have:

- installed new gutters and downpipes on Buildings I and B
- installed new roofing, gutters and down pipes on Buildings C and H
- replaced roofing and installed new eaves, gutters and downpipes on Building G.

Spring school holidays work

Initial work to begin pouring concrete for new pathways began on Monday 14 September 2026.

The spring school holiday period will provide an opportunity for school-wide construction work, including further excavation work and concrete pours to occur, without affecting learning. This work will include:

- construction of new general assistant's shed
- pouring of new concrete footpaths across the school site
- improving of swale drain near school oval
- replacement of translucent sheeting on the covered outdoor learning area
- installation of gutters and downpipes on covered walkways.

Work hours are between 7 am and 6 pm Monday to Friday, and 8 am and 1 pm on Saturday, in line with NSW Environment Protection Authority guidelines.

An electrical engineer has completed their assessment of the school's electrical supply to guide the future installation of air conditioning systems.

An archaeologist has also inspected the old well near Building A. The archaeologist will be on site during excavation works near Building A during the spring school holidays.

Heritage considerations

Due to the age of Robertson Public School, some buildings requiring investigation and repair work are heritage listed. The department is reviewing the suitability of these heritage buildings and the long-term management of mould on the school site. We will continue to keep you updated and informed as it progresses.

NSW Health advises that mould spores are present virtually everywhere, both indoors and outdoors, and mould is part of a group of very common organisms called fungi that also include mushrooms and yeast.

Further information can be found on the [NSW Health Mould Fact sheet](#).

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

If you have any questions about this project, you can contact School Infrastructure during business hours on the contact details below.

Thank you for your understanding and support during this important work.
