Whian Whian Public School
Works notification | 13 March 2026

Dear staff, parents, and carers,

As part of scheduled maintenance, we recently completed drinking water quality testing at Whian Whian Public School.

This test is conducted twice a year by an independent hygienist as a precautionary measure at schools that use potable tank water.

Water quality test result

The routine test was completed on Tuesday 3 March 2026. The results, received on Wednesday 11 March 2026, identified the presence of lead in the library practical activities tap.

As a safety precaution, access to the affected tap has been restricted. Signage is in place to remind students and staff not to use the outlet. We are coordinating with your school to see if bottled water and hand sanitisers are required for students and staff.

At this time, no other drinking water outlets have been identified as affected.

Necessary works

Licensed and qualified contractors have been requested to attend site as a priority to carry out any necessary works. Once completed, follow-up water testing will be done by our independent hygienist to ensure the water is safe and meets Australian Drinking Water Guidelines.

More information

The health, safety, and wellbeing of all members of our school and local community remain our highest priorities. If you have any health concerns, please consult a healthcare professional or contact your local NSW Health Public Health Unit on 1300 066 055.

Thank you for your understanding and support during this important work.
