

# St Johns Park High School

Works notification | 9 October 2023

Dear staff, parents/carers,

We are replacing the roof on the north side of Building C at St Johns Park High School. As part of this work, asbestos containing material in the eaves will need to be removed.

The areas are being safely used at present as the material is undisturbed. The material has been confirmed as bonded asbestos which means it is attached to other material such as cement or vinyl and cannot be crumbled by light pressure. The area will be cordoned off by a fence and hoarding before works start, and additional safety measures and monitoring put in place.

Work to remove the eaves will take place on Saturday 28 October 2023.

Work will be done in accordance with SafeWork NSW regulations and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

The area will be inspected by an independent occupational hygienist to confirm it has been fully remediated, and the school will receive a clearance certificate before the area is reopened.

The healthy, safety and wellbeing of students and staff is our highest priority.

Thank you for your cooperation during this important work.
