

Singleton Public School

Works notification | 28 August 2024

Dear staff, parents and carers,

We'd like to provide you an update on the engineer's inspection that was conducted on Building B at Singleton Public School on Tuesday 27 August 2024.

We received confirmation from the engineer advising that the building is structurally sound and can continue to be used for usual school operations. Building B has since been reopened.

Thank you for your patience.

Notification issued on 27 August 2024

Dear staff, parents and carers,

On Friday 23 August, there was an earthquake in the vicinity of Muswellbrook and Denman NSW and an aftershock on Saturday, 25 August. Impacts were felt across the Hunter region.

As a safety precaution, Muswellbrook High School and Muswellbrook South Public School were evacuated on Friday afternoon.

There were no reports of students or teachers injured.

Further to our [works notification from Sunday 25 August](#), Hunter region schools performed proactive safety inspections on Monday, 26 August.

During these inspections, a small amount of damage, not necessarily related to the earthquake, was identified in Building B at Singleton Public School.

The NSW Department of Education has engaged a licensed engineer to assess the damage today, Tuesday 27 August.

As a precaution, until we receive the results of the inspection, Building B will be cordoned off and one class will temporarily learn from an alternative location on the school grounds.

Singleton Public School is operational and students may continue to attend as normal on Tuesday 27 August 2024.

We will keep you updated.

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your patience and cooperation during this important work.
