

# Thirroul Public School

## Project update | February 2025

Dear staff, parents and carers,

As part of the NSW Government's record \$1.5 billion investment in maintenance and local upgrades, we will be undertaking maintenance work throughout Term 2 on the covered outdoor learning area (COLA), retaining walls and drainage at Thirroul Public School.

The southern end of the COLA, next to Building J, will be partially enclosed from a height of 3 metres to the roof, using galvanised metal mesh sheeting to provide protection from adverse weather.

New metal grates will also be installed in drains around this structure.

New retaining walls will be installed around the garden – near the main playground and the existing retaining wall near Building A – to prevent land slippage.

### More information

We will keep the community updated and provide more information as it becomes available.

If you have any questions about this project, please contact the NSW Department of Education during business hours on the details below.
