

Thirrourl Public School

Project update | July 2026

Image caption: Students excitedly discuss the new enhancements at Thirrourl Public School

Investing in our schools

As part of the NSW Government's plan to rebuild public education, the NSW Budget is delivering record education funding, including \$9 billion for new and upgraded schools. This targeted investment will ensure growing communities get access to a world class public education.

Project overview

We are delivering a range of enhancements and upgrades at Thirrourl Public School, including:

Upgraded accessible toilet

New accessible ramp, handrails and lift

Progress summary

Following our update from [April 2026](#), construction works have continued on accessibility upgrades throughout Term 2 2026.

The new accessible ramp has been in use since the beginning of Term 2 on Wednesday 22 April 2026.

The upgraded accessible toilet in Building E is finished and has been in use since Monday 1 June 2026.

Construction of the new lift located behind Building E was completed on Monday 22 June 2026 and is now in use. The lift provides improved access between Building E and the lower oval, enhancing accessibility across the school.

Next steps

Work to install permanent handrails and a weather cover for the new ramp has started and is on track to be finished by the start of Term 3 2026.

We are planning further accessibility work to connect the middle of the school to the bottom areas of the school and will update the community on these enhancements when we have more information.

Planned work over the upcoming winter school holidays

Separate from the accessibility upgrades, we will be replacing the floor coverings in a classroom in Building B during the upcoming winter holiday period. This area is known to contain bonded asbestos as listed on the School's Asbestos Management Plan.

All work involving asbestos containing materials will be done on Tuesday 7 July 2026.

All work will be done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures will be in place while work is being done. All work will be completed by licensed asbestos contractors and inspected by independent hygienists.

What to expect during construction

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

Work hours are between 7 am and 6 pm Monday to Friday, and 8 am and 1 pm on Saturday and Sunday. Deliveries will occur outside of pick-up and drop-off periods.

Contractor vehicles will enter and exit from Roxburgh Avenue and Church Street. Please refer to the map below for the location of work.

Construction equipment including power tools will be used throughout this project.

Contractors will work with the school to minimise disruptions to learning.

For more information on how construction will be managed, please visit the School Infrastructure website: edu.nsw.link/ConstructionImpacts.

More information

If you have any questions about this work, please contact the NSW Department of Education on the details below during business hours.

Thank you for your cooperation during this important work.
