

Toomelah Public School

Works notification | 17 February 2026

Dear staff, parents, and carers,

We recently conducted drinking water quality testing at Toomelah Public School as part of our routine testing program.

This biannual routine testing was completed on Thursday 20 November 2025. The results, received on Monday 12 January 2026 identified contamination in the school's tank water supply.

As a safety precaution, access to the affected area has been restricted. Signage is in place to remind students and staff not to use these outlets. We are coordinating with your school to see if bottled water and hand sanitiser is required for staff and students.

Testing confirmed the presence of lead in the following locations:

- Bubblers in Building G.

Please be advised no other drinking water outlets are affected and therefore they can continue to be used.

Qualified and licensed contractor plumbers will perform all repairs, and additional water testing will be done afterwards to ensure the water is safe by our independent hygienist.

The health, safety, and wellbeing of our school community is our highest priority. If you have any health concerns, please consult a healthcare professional or contact the [your local NSW Health Public Health Unit](#) on 1300 066 055.

If you have any questions regarding this process, please contact the NSW Department of Education using the details provided below or visit our [website](#) for further information.

Thank you for your understanding and cooperation during this important work.
