

Toronto Public School

Works notification | 15 December 2025

Dear staff, parents and carers,

Damage in the form of a crack was recently found at an internal wall in Building F at Toronto Public School.

The damage occurred on Monday 8 December 2025. As the wall lining is known to contain asbestos, access to this room was immediately restricted and an independent hygienist was engaged to undertake testing and provide advice.

Testing confirmed that the material is bonded.

NSW Health explains that "living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged".

Repair of the wall by sealing the crack took place on Friday 12 December 2025 between the hours of 7 am to 1 pm.

All work was completed in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures including air monitoring were in place while work is being done. All work was completed by licensed asbestos contractors and inspected by independent hygienists before the room is reopened for use.

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

Thank you for your understanding during this important work.
