

Wiangaree Public School

Works notification | 21 August 2024

Dear staff, parents, and carers,

Further to the [Works Notification from 27 June](#) regarding the drinking water quality test results for Wiangaree Public School, remediation work has been completed by a qualified and accredited tradesperson following advice from an independent hygienist.

Re-testing of the affected tap outlets by an independent hygienist has returned results that meet the requirements of the [Australian Drinking Water Guidelines](#).

Access to the tap outlets in the following locations has been restored and can be used again by students and staff:

- staff room sink, Building A
- practical activities area, Building A.

However, the tap outlets in the following locations require additional work before access can be restored:

- boys' toilet handbasin, Building B
- staff toilet handbasin, Building B.

This is because the samples did not meet the requirements of the [Australian Drinking Water Guidelines](#) after the initial cleaning, disinfection, and re-testing.

The health and wellbeing of students, staff, and the local community is our highest priority.

We will keep the community updated.

Thank you for your cooperation during this important work.
