

Wiripaang Public School Project update | December 2025

Image caption: artist impression showing external view of the hall (subject to change)

Investing in our schools

The \$284.3 million [Australian Government Schools Upgrade Fund](#) is delivering grants to improve school facilities across the country.

These grants are designed to help schools and their students get back on track after disruptions caused by COVID-19. Public Schools in NSW have a \$68 million share of the fund for infrastructure projects and facility improvements.

Project overview

Wiripaang Public School is receiving a new hall, as part of this investment.

The new school hall will be located between the covered outdoor learning area, canteen and library.

Tender stage

The project retendering process has started. The first tendering process was unsuccessful, which means some key steps need to be repeated.

Assessment of tenders will start late Term 4 2025, marking an important step forward in delivering the new, modern school hall for our community.

Next steps

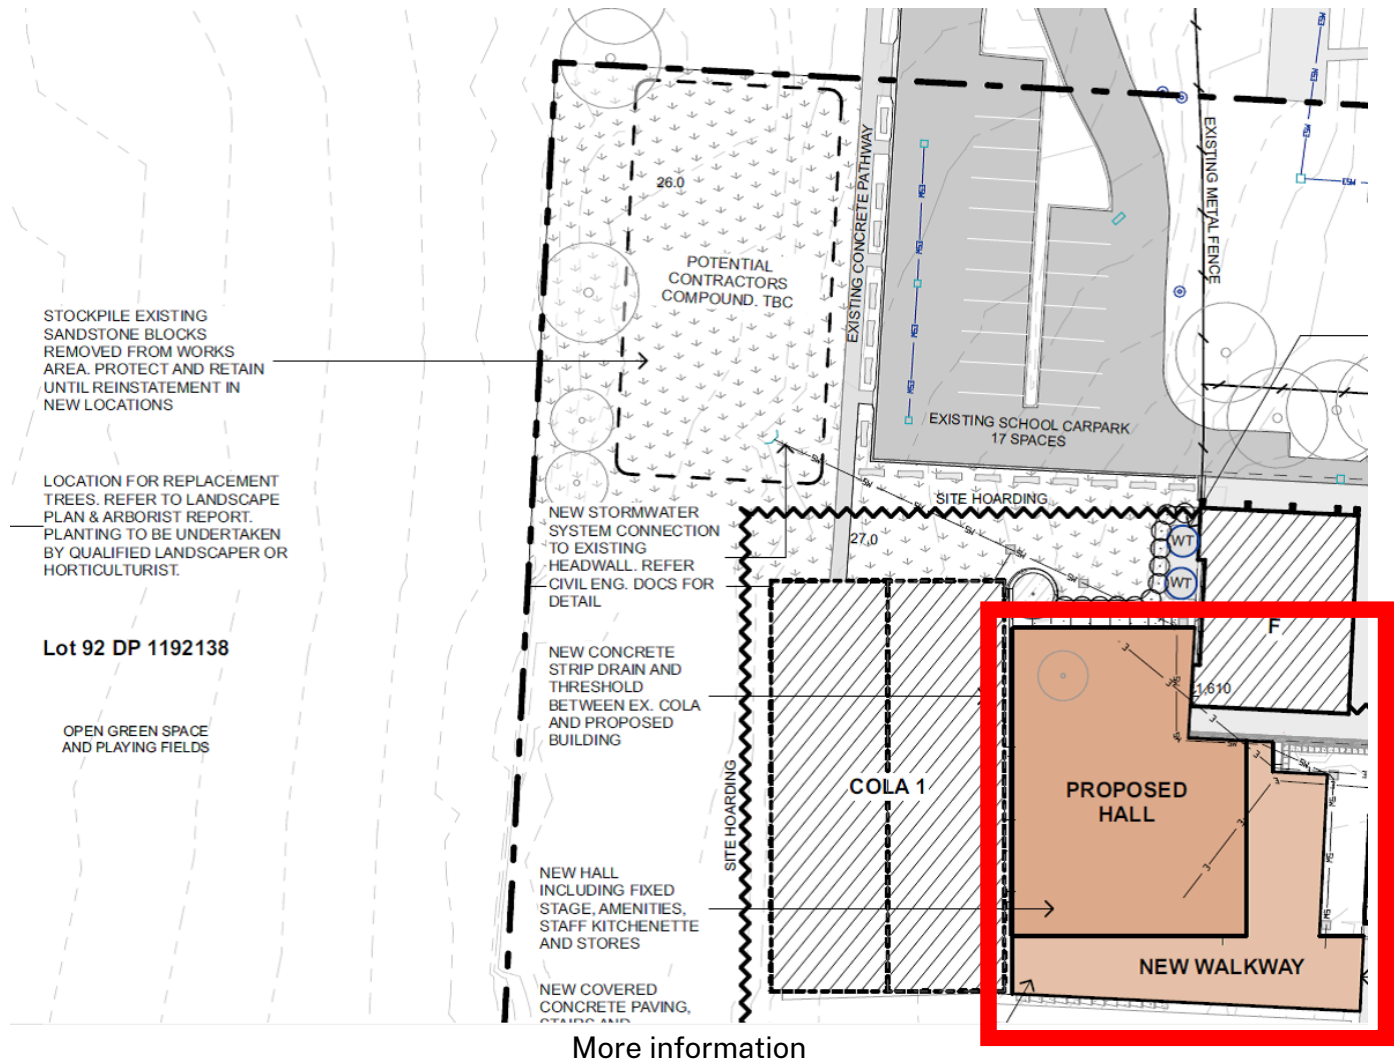

Construction on the new hall will begin early 2026 when the tender has closed and a contract has been awarded.
