

Turramurra Public School

Works notification | 1 May 2026

Dear staff, parents, and carers,

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

As part of routine site maintenance, on Wednesday 29 April 2026, fragments of material suspected to contain asbestos were identified by a member of staff on the ground behind Building C, near the play oval at Turramurra Public School.

As a precaution, the area was made out of bounds to students and staff. An independent hygienist was engaged to undertake testing and provide advice.

For more information about asbestos please visit the [NSW Health website](https://www.nsw.gov.au/health) or scan the QR code.

Test results confirmed the fragments found contained bonded asbestos. The location where the fragment was found was already listed in the school's asbestos management plan.

Work to remove the material and clear the surrounding soil has taken place. The independent hygienist inspected the area and provided clearance for it to be reopened.

Safety measures including fencing, air monitoring, signage and workers wearing personal protective equipment were in place during this work. All work was done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan.

All work was completed by licensed asbestos contractors.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your understanding and support during this important work.

What makes Turramurra Public School special?

"We feel so lucky to have our children at such an incredible school with supportive and invested teachers."

- parent of Turramurra Public School
