Dobroyd Point Public School

Works notification | 17 September 2026

Dear parents, carers, staff and neighbours,

Dobroyd Point Public School is proposing fencing and landscaping improvements along the school boundary. The proposed works will support student wellbeing and improve the appearance of the school and its boundaries along Waratah Street, Chelmsford Avenue and Louden Avenue.

We are seeking feedback from our neighbours and the local community before progressing this proposed improvement.

This proposal includes the installation of 1.8 metre high flat-top palisade style fencing along the 3 street frontages. The proposed replacement fencing will be located inside the existing boundary to minimise its impact on the streetscape. We plan to remove most of the existing perimeter fence on 3 sides of the site to make way for the new fence.

No trees will be removed, and additional shrubs and plants will be planted near the fence to maintain the school's existing character. The landscaping will help soften the appearance of the fencing and improve the overall presentation of the area.

We have carefully planned the fencing works in line with our statutory planning team's advice to ensure they are appropriate for the school and surrounding area. Heritage specialists have been consulted in recognition of Haberfield's conservation status and arborists have been engaged to ensure the proposed works do not adversely affect the health of nearby trees.

The school grounds have historically been accessible outside of school hours and the proposed fencing upgrade is not intended to change the existing arrangements for community access. The school currently participates in the Share Our Space program, which will continue.

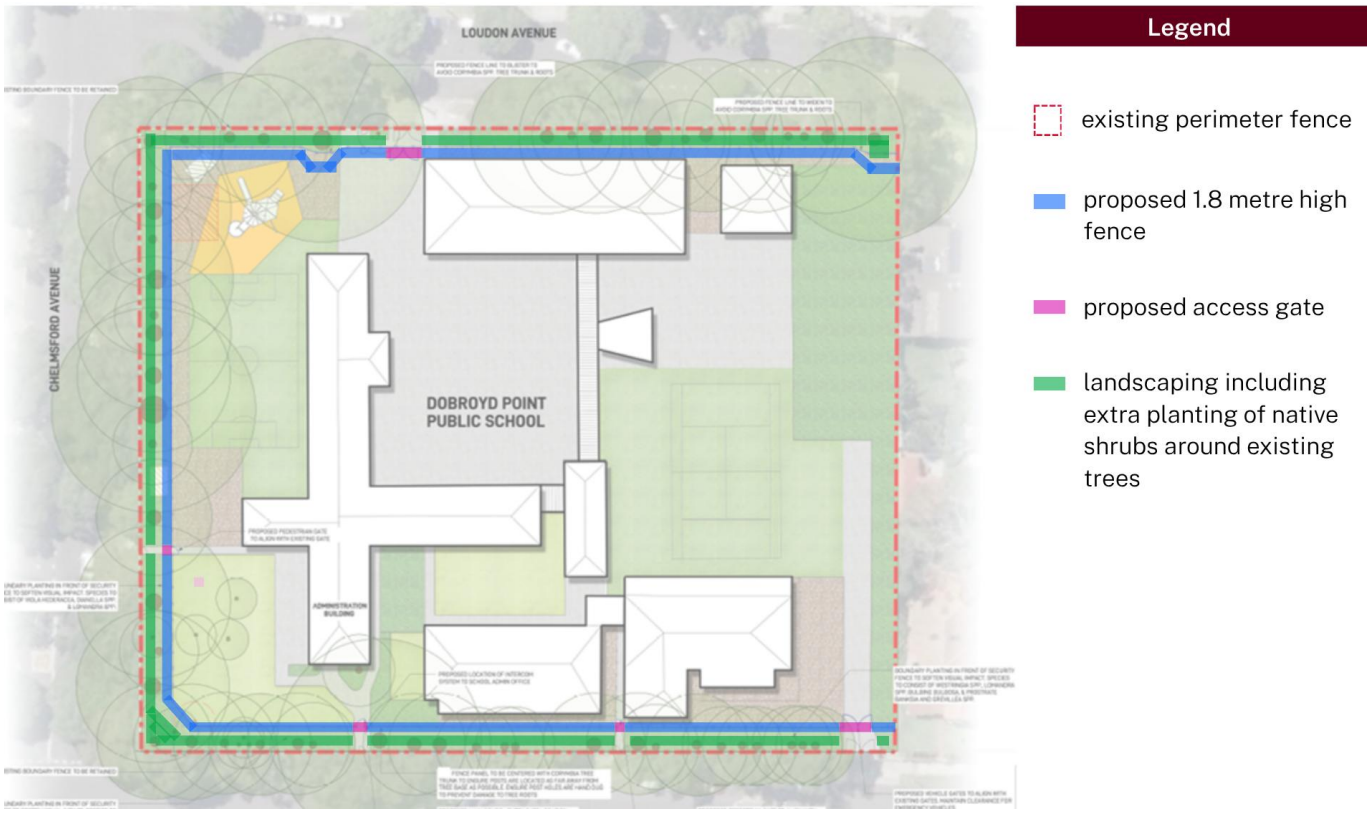
The image below shows the proposed locations of the new fence and landscaping.



We recognise that changes to fencing and landscaping may be of interest to our neighbours and the broader community.

We are committed to maintaining positive relationships with our local community and welcome your views and feedback on the proposal.

If you have any feedback about the planned work, please contact us on 1300 482 651 or schoolinfrastructure@det.nsw.edu.au by 8 October 2026.

Please note our community phone and email are staffed from Monday to Friday between 9 am and 5 pm.
