

Kahibah Public School

Project update

October 2022

Project overview

The Department is currently undergoing a program of works to build a new Administration Building at Kahibah Public School. The new building will be located on the south-eastern boundary of the school next to Symes Avenue. Works will include:

- Removal of 11 trees and shrubs and an existing shed as per the approved Tree Permit Notice of Determination issued under Part 3 of the State Environmental Planning Policy by Lake Macquarie City Council on 27 April 2022.
- Site establishment, including installing temporary fencing and setting up site sheds.
- Civil preparation works.
- Construction of the new building.
- Internal works to existing buildings including painting, carpentry, fitments and fixture upgrades.

Progress update

The Development Application for the project was approved by Lake Macquarie Council in late September 2022 and a construction contract awarded to Patterson Building Group.

Early construction works started during the school holidays period on Tuesday 4 October 2022 to prepare the site. This included the removal of trees and a shed.

Next steps

Site establishment will start from Tuesday 18 October 2022. This includes installation of temporary fencing and signage, site sheds and amenities prior to construction of the new building starting.

Construction vehicles will access the site from the Symes Avenue gates, with traffic management in place. Patterson Building Group will be responsible for all traffic management and control during deliveries and throughout the construction period.

The new building and associated works will take approximately 6 months to complete. The department will update the community as the project progresses.

Work hours

Construction work hours will be 7 am to 6 pm Monday to Friday and from 8 am to 1 pm on Saturday. No work will take place on Sundays or public holidays unless otherwise notified. School Infrastructure NSW will continue to work closely with the school to minimise any disruption to students and staff during construction.

More information

We are excited to be delivering these important improvements to your school. If you have any questions about the project, please contact the school directly, or contact School Infrastructure NSW on the details below.
