

Beverly Hills North Public School

Works notification | 8 November 2024

Dear staff, parents and carers,

As part of our planned maintenance program at Beverly Hills North Public School, we will be replacing sections of the roof on Buildings K and H.

The eave linings for Buildings K are known to contain bonded asbestos as listed on the school's asbestos register. The eave linings for Building H are suspected to contain bonded asbestos and are not listed on the school's asbestos register.

NSW Health explains that "living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged".

The linings in both buildings will be removed by licensed asbestos contractors on Saturday 16 November 2024 between 8 am and 5 pm. Temporary fencing will be constructed around the area and an independent hygienist will be engaged to conduct air monitoring.

All work involving asbestos will be done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures will be in place while work is being done. All work will be completed by licensed asbestos contractors and monitored by independent hygienists.

Once the asbestos removal portion of the work is complete, an independent hygienist will issue a clearance certificate before further works take place.

Work to replace the roof with non-hazardous material is scheduled to occur during the week of 18 November 2024. Work is expected to take one day to complete. The temporary fencing will remain in place during this work and school operations will be unaffected.

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
