

Maitland Public School

Works notification | 13 June 2023

Dear staff and parents/carers,

We are replacing the roof sheeting of Building C at Maitland Public School.

As part of planning for the roof replacement work, some lead containing material was identified within the roof cavity of Building C. As a result, some precautionary remediation to remove the lead material will occur within the roof cavity on Saturday 17 June 2023.

An independent occupational hygienist has confirmed all buildings remain safe for general occupation as the affected area is located within the roof cavity, sealed off and therefore inaccessible to students, staff and visitors.

Safety measures, including air monitoring, will be in place and all work zones will be out of bounds while work is carried out.

All work will be done in accordance with SafeWork NSW regulations and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies, and guidelines.

The roof cavity will be inspected by an independent hygienist to confirm it has been fully remediated, and the contractor will receive a clearance certificate before the roof work can continue.

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
