

Collaroy Plateau Public School

Works notification | 16 December 2025

Dear staff, parents and carers,

Last week, material suspected to contain bonded asbestos was found and has since been removed from the western side of Building D, in between the boundary line and Building B at Collaroy Plateau Public School.

As a precaution an independent hygienist was engaged to collect the fragments for testing and provide advice. Testing confirmed that the fragments contained bonded asbestos. The independent hygienist has inspected the area and confirmed that it can be reopened for usual school activities.

NSW Health explains that “living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged”.

The fragments were located in an area not currently identified on the School Asbestos Management Plan. The plan will be updated to include this recent find as required.

All work was carried out in accordance with work health and safety laws and the NSW Department of Education’s Asbestos Management Plan. Safety measures were in place while work was being done. All work was completed by licensed asbestos contractors and was inspected by independent hygienists.

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

What makes Collaroy Plateau Public School special?

Collaroy Plateau Public School combines a warm community spirit with a strong commitment to “Striving for Excellence,” offering a nurturing environment from Kindergarten through Year 6. The school is renowned for its broad curriculum and specialist programs that support academic success as well as growth in sport, music, the creative arts and wellbeing. With a supportive partnership between dedicated staff, parents and the wider community, every student feels safe, included and ready to learn — making it a leading public school in the Northern Beaches region.
