

Cabramatta West Public School

Works notification | 3 September 2026

Dear staff, parents and carers,

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

On Tuesday 1 September 2026, asbestos-containing fragments (ACM) have been found on top of the soil in the south-west grassed area of Building B.

This area is located in an out of bounds area to students, staff and school visitors. This area is identified as containing assumed asbestos in the school's Asbestos Management Plan (SAMP).

An independent hygienist was engaged and undertook site inspection and testing. Testing has confirmed the presence of bonded ACM fragments.

We are currently planning stormwater upgrade works in this area. As part of the planning and preparation, ACM may be encountered and, if required, appropriate removal and management works will be undertaken.

Further information, including the confirmed dates and work hours, will be provided to the school community once arrangements have been finalised.

If you have any questions about this work, please contact the NSW Department of Education using the details below.

Thank you for your understanding and cooperation while this planned maintenance work is undertaken.
