

Cabramatta West Public School

Works notification | 9 March 2026

Dear staff, parents and carers,

On Thursday 29 January 2026, mould was found along the bottom of the wall in the computer lab at Cabramatta West Public School. The room was immediately closed and locked to students and staff. Learning was relocated to other available classrooms.

An independent hygienist attended the school on Friday 30 January 2026 to inspect the area and collect samples for testing. On Tuesday 17 February 2026, a contractor attended to further inspect the area and implement initial measures, while awaiting the hygienist's formal advice.

Testing results confirmed the presence of mould.

In accordance with the hygienist's advice, licensed and qualified environmental cleaning contractors carried out a full environmental clean, which was completed on Tuesday 3 March 2026.

All work involving mould took place outside of school hours, with appropriate safety measures in place. Use and access to the building was restricted until the area was fully cleaned. The computer lab has since reopened for school activities.

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

Thank you for your cooperation during this important work.
