

Chester Hill North Public School

Works notification | 4 August 2026

Dear staff, parents, and carers,

During the winter school holidays, while upgrading the storm water system, we found material suspected to contain bonded asbestos in Building B at Chester Hill North Public School.

As a precaution, the area was isolated and an independent hygienist was engaged to undertake testing and provide advice.

Test results confirmed the piece of material as bonded asbestos. This location is not an area identified on the School Asbestos Management Plan (SAMP).

The material has been removed by licensed asbestos contractors with safety measures in place. The hygienist has since given clearance for the area to reopen. Work was conducted in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan.

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your understanding and support during this important work.
