

Balgowlah North Public School

Works notification | 4 March 2024

Dear staff, parents/carers,

On Tuesday 27 February, mould was detected in two demountable classrooms at Balgowlah North Public School.

The rooms affected are the classroom located next to the staff carpark. The students from this class have been relocated to the library until investigations and any necessary work is completed.

The other room affected is located next to the playground and is used by staff.

Both rooms have now been locked and made out of bounds.

We have engaged an independent hygienist to assist with investigating the source of the mould. The mould is likely to have been caused by the humidity building up in the rooms during the summer holiday period. Once the source of the mould is identified, then remediation will start as recommended by the hygienist.

All inspections and remediation works will be conducted in accordance with recommendations from the independent hygienist. The rooms will not be used until a clearance certificate is received.,

We will keep you updated about the progress of this work.

The health, safety and wellbeing of the school and the local community are our highest priority. If you have any questions about the work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
