

Cringila Public School

Completion Pack – November 2025

Renewal of the open field area

Welcome to your improved school

Since May 2025 we have been working on a remediation project at Cringila Public School to address concerns related to historical landfill material in the fenced off area of the school grounds.

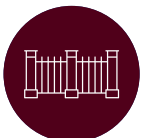

Throughout this time contractors have installed fencing, new walls, capping layers and new monitoring wells before re-turfing the area so that the school community can use the space again.

We are thrilled to announce that these works at Cringila Public School have reached completion.

This project delivered:

a new multi-layer protective cap, topped with turf to stop oxygen from reaching the coal wash beneath

a new boundary fence, extended internal fence and a tall fence for the new open field area, to catch sports balls

new gabion walls – rocks held in wire mesh that allow water to drain while supporting the area as a strong retaining wall

new monitoring wells to check environmental conditions

Message from your Principal

We are excited to see the completion of these important remediation works, including the installation of a new boundary fence and the renewal of the open field area.

This space will soon offer our students more room to play, explore, and enjoy -especially with the open field that will support activities like soccer and other outdoor games.

Having this additional safe and revitalised area is a great benefit for our school, and we're excited about the opportunities it will bring for student wellbeing, learning, and connection.

I would like to thank our school community for their patience throughout the works.

Mrs Amanda Giles
Principal

Key information:

- Final testing was completed and independent experts will finalise their recommendations for the area's long-term maintenance. Temporary fencing around the area is to protect the new turf while it establishes.
- The area will remain closed while the grass grows to a suitable condition for school activities to avoid damaging the surface.
- The new turf will have limited access for some students and staff in Term 4 2025. Full use of the area is planned for Term 1, 2026 with scheduling details to be communicated by the school.
- We'll continue to provide updates if any changes arise. Thank you for your support as we finalise this important project for the Cringila Public School community.

Thank you

Thank you for your patience during the removal and construction. We feel privileged to have delivered this project for the Cringila Public School community. Your support has made it possible for us to deliver new facilities for students and staff.
