

Cringila Public School

Works notification | 7 February 2024

Dear staff, parents and carers,

Over the Summer school holidays we completed grass and weed maintenance work at Cringila Public School.

This work was in the fenced off remediation site on the school grounds near the northwest boundary and involved working around material in the ground known to contain asbestos. An independent occupational hygienist was on site during the work and safety measures and monitoring were put in place under the advice of the hygienist.

Work was done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. All work was completed by licensed and accredited asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies, and guidelines.

The area was inspected after the weed control work, and it will remain out of bounds to anyone visiting the school site until the remediation work is finished.

Planned remediation work for this area is scheduled to begin in 2024.

The health, safety, and wellbeing of the school and the local community is our highest priority. Thank you for your cooperation during this important work.

If you have any questions about this work or the remediation work due to take place, please contact us on the details below.
