

# Oxley Park Public School

## Works notification | 22 July 2024

Dear staff, parents and carers,

On Friday 28 June 2024, a fragment of building material was found on the ground along the eastern boundary of Oxley Park Public School.

The material was suspected to contain asbestos.

As a precautionary measure the fragment was covered, and the area was cordoned off and made inaccessible.

We engaged an independent hygienist to inspect the area, remove the sample for testing and conduct air monitoring.

The independent hygienist provided clearance for the area on Monday 1 July 2024 and the area was re-opened before students started school.

On Thursday 4 July 2024, testing confirmed the sample did contain asbestos.

The independent hygienist is developing a site-specific asbestos management plan (SSAMP) for the school. When the SSAMP is finalised, it will be available online with the school's asbestos register.

All work was done outside of school hours, in accordance with work, health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures were in place while work was done.

All work was completed by licensed and accredited asbestos contractors and monitored by independent hygienists in strict accordance with all applicable legislation, regulations, policies, and guidelines.

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
