

Central Mangrove Public School

Works notification | 28 July 2026

Dear staff, parents and carers,

Following our works notification on 22 July regarding drinking water quality at Central Mangrove Public School, remediation work has now been finished by a qualified and accredited tradesperson.

Re-testing of the affected tap outlets by an independent hygienist has confirmed the results meet the requirements of the Australian Drinking Water Guidelines.

Access to all water taps and bubblers has been restored.

Thank you for your cooperation during this important work.

Notification issued 22 July 2026

Dear staff, parents, and carers,

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

On Tuesday 21 July 2026, sediment was found in the drinking water supply tanks at Central Mangrove Public School.

As a precaution, all drinking and handwashing water outlets were immediately isolated and an independent hygienist was engaged to test water quality within the water supply tanks and provide advice.

Access to all drinking and handwashing water taps remain restricted. Signs are in place to remind students and staff not to use these outlets.

Bottled water and hand sanitiser have been provided for students and staff.

Once we receive the independent hygienist's recommendations, licensed and qualified contractors will attend the site as a priority to carry out any necessary work. Follow-up water testing will be done by an independent hygienist to ensure the water is safe and meets the [Australian Drinking Water Guidelines](#).

We will keep the school community informed as the works progress and notify you when the water outlets are ready for use.

If you have any health concerns, please consult a healthcare professional or contact the [your local NSW Health Public Health Unit](#) on 1300 066 055.

If you have any questions about this, please contact the NSW Department of Education.

Thank you for your understanding and support during this important work.
