

Heaton Public School

School holiday works notification | 26 April 2023

School Infrastructure NSW regularly inspects and maintains school infrastructure as part of a comprehensive and ongoing program to keep school assets in optimal condition and ensure the safety and wellbeing of our school community across more than 2,200 NSW schools.

The school holidays are the ideal time for some maintenance projects as it means work can take place without disrupting learning.

Planned maintenance over the holidays may involve working with hazardous materials such as asbestos or lead containing material. This is to notify you of work that took place during the Term 1 school holidays.

Planned maintenance activities between 7 April – 24 April 2023

During the school holidays, maintenance works at Heaton Public School included working with asbestos containing material in the ceiling cavity in the General Assistant shed in Building B.

Safety measures and monitoring were in place and the area remained out of bounds to anyone on site until the asbestos removal and associated maintenance work was finished.

The area was remediated in accordance with SafeWork NSW regulations and the NSW Department of Education's Asbestos Management Plan. All work was completed by licensed and accredited asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

The hygienist inspected the area to confirm it had been fully remediated, and the school received a clearance certificate before the area was reopened to staff.

The health, safety, and wellbeing of the school and the local community is our highest priority. Thank you for your cooperation during this important work.
