

Young North Public School

Works notification

15 September 2022

Upcoming maintenance works as part of the Cooler Classrooms Program to deliver sustainable air conditioning, heating and fresh air ventilation systems at Young North Public School, will involve working with asbestos containing material in the ceiling of two classrooms in Block F.

We are following all the advice and protocols of asbestos removalists, assessors and other experts.

Work will take place on Monday 26 September 2022. All asbestos containing material will be removed outside of school hours and in accordance with the advice of the independent hygienist.

The area is cordoned off and safety measures have been implemented including installing air monitors. It will remain out of bounds to students and staff until the remediation is completed.

This area will be remediated in accordance with SafeWork NSW regulations and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited asbestos contractors, and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

The area will be inspected to ensure it has been fully remediated. The school will receive a clearance certificate before the area is open to students and staff.

The health, safety, and wellbeing of the school and the local community is our highest priority and we will continue to keep the community updated.

Thank you for your cooperation during this important work.
