

Black Springs Public School

Works notification | 30 May 2024

Dear staff and parents/carers,

Drinking water quality testing was recently conducted at Black Springs Public School as part of our routine water testing program.

Findings have detected bacteria in samples collected from a bubbler near Building A, basin tap in Building A (staff facility), kitchen sink tap in Building B (staff facility) and water tank.

As a precautionary safety measure, access has been restricted to the tap and signage has been installed as a reminder for students and staff. Bottled water is being supplied as an alternative for staff and students as needed. We are working with an independent hygienist to undertake any remediation work required.

All work will be carried out by qualified contractors, and we will undertake additional testing at the school following the work to ensure the water is safe for use. We will provide an update once we have confirmation of the details of this work.

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
