

# Black Springs Public School

## Works notification | 5 March 2025

Dear staff, parents and carers,

Drinking water quality testing was recently conducted at Black Springs Public School as part of our routine water testing program.

We have detected findings from the following tap outlets:

- sink tap in the library (bacteria)
- sink tap in Building C (bacteria)
- bubblers north of Building A (lead)
- staff toilet sink in Building A (lead)

Access has been restricted and signage has been installed to remind students and staff not to use the affected tap outlets.

The school has been provided with bottled drinking water and hand sanitiser for handwashing.

We are working with an independent hygienist and qualified contractors to carry out any required remediation work required.

When work is complete, the independent hygienist will re-test the outlets to ensure the water meets the requirements of the [Australian Drinking Water Guidelines](#).

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
