Kempsey South Public School

Works notification | 16 October 2025

Dear staff, parents and carers,

As part of planned maintenance, we are upgrading the male and female toilets in Building 3, the facilities block, at Kempsey South Public School.

Part of this work involves removing ceiling sheeting known to contain bonded asbestos as listed on the school's asbestos management plan. The material is undisturbed and in good condition.

NSW Health explains that "living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged".

The asbestos removal will take place this weekend, 18–19 October 2025. Safety measures will be in place during the work including air monitoring, signage and personal protective equipment worn by workers.

All work will be done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed asbestos contractors and inspected by independent hygienists.

During the holidays, temporary toilet facilities and fencing were installed in preparation for the work to start. While the toilets are being upgraded, students can use these temporary toilet facilities which are located outside Building 3.

Work is expected to finish by the end of Term 4.

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

Thank you for your cooperation during this important work.
