

# Glendale East Public School

## Works notification | 27 February 2025

Dear staff, parents and carers,

On Tuesday 25 February 2025, a fragment of material suspected to contain asbestos was found on the ground in an 'out of bounds' grassed area behind the staff facilities building (Block B) at Glendale East Public School.

The area was temporarily fenced off from students and staff. An independent hygienist was engaged to remove the fragment for testing.

Testing returned a positive result for bonded asbestos, which means it is attached to other materials such as tiles or cement and cannot be crumbled by light pressure.

NSW Health explains 'that if bonded asbestos is mixed with cement or other hard bonding materials, and in good condition, it is likely to be low-risk'.

Work to clear the ground and inspect the area is planned for Saturday 8 March 2025.

This area is already listed on the school's site-specific asbestos management plan, which will be updated with this latest find. All work involving asbestos-containing materials will be completed outside of school hours.

All work will be done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures will be in place while work is being done. All work will be completed by licensed asbestos contractors and monitored by independent hygienists.

The health, safety and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
