Bilgola Plateau Public School

Works notification | 26 June 2026

Dear staff, parents, and carers,

On Friday 19 June 2026, a student found a small fragment of material suspected to contain bonded asbestos in the dirt area near the sandpit, south of Building A at Bilgola Plateau Public School.

As a precaution, the area was isolated to students and staff. An independent hygienist was engaged to undertake testing and provide advice.

Test results confirmed the material as bonded asbestos. This location is not an area identified on the School Asbestos Management Plan (SAMP).

The material has been removed by licensed asbestos contractors with safety measures in place. The hygienist has since given clearance for the areas to reopen. Work was conducted in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan.

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your understanding and support during this important work.

For more information about asbestos, please visit the NSW Health website or scan the QR code.
