Investing in our schools

As part of the NSW Government's plan to rebuild public education, the NSW Budget is delivering record education funding, including \$9 billion for new and upgraded schools. This targeted investment will ensure growing communities get access to a world class public education.

Project overview

Since our [June 2025 update](#), major upgrades and landscaping works are currently underway at Belair Public School as part of how we manage in-ground asbestos at Belair Public School. As part of this remediation, the school will also receive new play areas, a sports court, and revitalised outdoor spaces which are nearing completion.

Progress summary

Works completed to date include:

- installation of new play equipment, playing field, dry creek bed and gardens
- landscaping of rock and timber areas, including laying new turf
- installation of turf, fresh soil, fresh mulch, and Virgin Excavated Natural Material (VENM)
- installation of new stormwater and drainage to be incorporated into the existing stormwater system.

Safety measures including signage and workers wearing personal protective equipment have been and will continue to be in place during this work. All work will and has been done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan.

All work will and has been completed by licensed asbestos contractors and inspected by an independent hygienist who will provide clearance to continue using the areas.

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.

Next steps

Finishing touches are to be placed on the basketball court and handrails in December 2025, marking the final completion of the project.

Landscaping

This picture shows some of the freshly landscaped areas now open for students and staff to enjoy at Belair Public School.
