## School holiday works notification - Summer | February 2024

School Infrastructure NSW regularly inspects and maintains schools to ensure the safety and wellbeing of our school communities.

The school holidays are the ideal time for a lot of maintenance and project work to take place in schools across the state without disrupting learning. The Summer school holiday period is our busiest of the year as this extended time allows us to complete work that takes longer or may be more disruptive.

Planned work over the school holidays at some schools may involve working with hazardous materials such as asbestos or lead containing material. This may include remediation or removal of material, or sampling. This notification is to let you know about work that took place at your school involving these materials.

### **Repair of flood damage to classroom.**

During works to repair flood damage to the homebase classroom in Building B, asbestos containing material was found in vinyl tiles in the classroom.

The classroom has been locked and secured. Safety measures and monitoring are in place and the area will remain out of bounds until the asbestos removal work has been completed.

Work is planned for Saturday 10 February and Sunday 11 February.

Vacation care have been advised and have moved to another area of the school until work is completed.

Work will be done in accordance with work, health and safety laws and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies, and guidelines.

When remediation work is finished, the classroom will be inspected, and the school will receive a clearance certificate before the classroom is reopened.

The health, safety, and wellbeing of the school and the local community is our highest priority.

If you have any questions about the work, please contact us on the details below.
