

Killarney Heights Public School

Works notification | 2 May 2024

Dear staff and parents/carers,

We are refurbishing student toilets and replacing the windows in Building L of Killarney Heights Public School. This work involves working with bonded asbestos containing material in the ceiling eaves, as listed on the school's asbestos register.

NSW Health explains that if bonded asbestos is mixed with cement or other hard bonding materials, and in good condition, it is likely to be low risk.

Work to remove the ceiling eaves took place on **Saturday 13 April**. Work was done within a work zone, and the area was cordoned off before work started, with safety measures and air monitoring in place.

All work involving asbestos containing materials took place outside of school hours.

Following this work, the school received a clearance certificate from an independent hygienist before work on the refurbishment continued.

All work was done in accordance with work, health and safety laws and the NSW Department of Education's Asbestos Management Plan. All work was completed by licensed and accredited asbestos contractors and monitored by independent hygienists in strict accordance with all applicable legislation, regulations, policies, and guidelines.

Work to complete the refurbishment will be completed in **Term 2 2024** and students will continue to use the newly refurbished toilets in Buildings G and H during the ongoing work.

The health, safety and wellbeing of the school and the local community are our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
