Wyoming Public School
Works notification | 17 August 2026

Dear staff, parents and carers,

On Monday 10 August 2026, minor damage to a toilet cubicle partition was found in the student bathroom in Building A at Wyoming Public School.

This partition is known to contain bonded asbestos as listed on the School Asbestos Management Plan. As a precaution, the area was immediately isolated.

We organised for repairs to take place on the same day. All work involving asbestos-containing materials took place outside of school hours with air monitoring and safety measures in place.

An independent hygienist returned to inspect the work and confirmed that could reopen for usual school activities.

All work was done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan.

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

If you have any questions about this, please contact the NSW Department of Education using the details below.

Thank you for your understanding and support.
