

Wyoming Public School

Works notification | 19 November 2025

Dear staff, parents and carers,

On Saturday 22 November 2025, we will be replacing a classroom window in Building D of Wyoming Public School.

This work requires removing bonded asbestos from the window frame's putty, which is listed on the school's asbestos management plan. No students will be on site during the works.

An independent hygienist has been engaged to oversee the works and conduct air monitoring and testing following the removal of asbestos-containing materials. A clearance certificate will be provided before the area is reopened for usual school activities.

NSW Health explains that "living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged".

All work involving asbestos-containing materials will take place outside of school hours and in accordance with work health and safety laws as well as the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed asbestos contractors and inspected by independent hygienists.

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities. We will keep the community updated.

Thank you for your cooperation during this important work.

Did you know?

Wyoming Public School is a dynamic community that nurtures resilient, empowered, creative and inspired learners. Our dedicated staff work in partnership with families to create engaging, personalised learning experiences that help students thrive. With a rich curriculum and a wide range of opportunities in academics, wellbeing, and the arts, Wyoming Public School is a place where children grow with confidence and curiosity.
