

Crestwood Public School

Works notification | 20 November 2024

Dear staff, parents and carers,

Following a recent routine inspection on 8 November, cracks were identified on the roof eaves of 3 demountable classrooms at Crestwood Public School. Material in the external eaves of these 3 demountable classrooms are known to contain bonded asbestos as listed on the school's asbestos register.

NSW Health explains that 'living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged'.

As the external eave material remained secure, the demountable buildings can continue to be used. Work to remove the eaves and replace with new timber material is scheduled to take place on Saturday 23 November 2024.

All work involving asbestos-containing materials will take place outside of school hours.

All work will be done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed asbestos contractors and monitored by independent hygienists.

The health, safety and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
