

King Park Public School

Works notification | 28 March 2025

Dear staff, parents and carers,

Pieces of vinyl tile assumed to contain bonded asbestos have been found by staff under a cabinet, in a classroom of Building D, at King Park Public School on 25 March 2025.

As the vinyl is listed in the school's asbestos register, the room was immediately locked to restrict access, and students have been relocated to the library for their learning.

Testing completed by an independent hygienist the same day (25 March) confirmed the presence of bonded asbestos.

NSW Health explains that "living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged".

The classroom will remain closed until remediation work is completed and a clearance certificate is provided by the independent hygienist.

We will update the community when this work has been scheduled.

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

Thank you for your cooperation during this important work.
