

Winston Heights Public School

Works notification | 14 March 2024

Dear staff, parents and carers,

During a routine site inspection on Tuesday 12 March 2024, water damage was discovered in the external eaves in the general learning building, Building I.

This building contains known asbestos in ceiling sheets as per the school's asbestos register. The area was immediately fenced off and made out of bounds.

Roofing contractors attended the school to repair the leak in the roof which caused the initial damage.

Work will then take place to replace the eaves on Saturday 23 March. After the work is completed, the area will be inspected by an independent hygienist and the school will receive a clearance certificate before the area is reopened.

All work will be done in accordance with work, health and safety laws and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited asbestos contractors and monitored by independent hygienists in strict accordance with all applicable legislation, regulations, policies, and guidelines.

The health, safety, and wellbeing of the school and local community is our highest priority.

Thank you for your cooperation during this important work.
