Winston Heights Public School
Works notification | 1 December 2025

Dear staff, parents and carers,

During last week's heavy storm conditions, sheet material containing fragments of bonded asbestos were dislodged from a neighbouring property and washed onto the grounds of Winston Heights Public School.

No one at the school was injured during the weather event. The area, which lies near the perimeter fence behind Building A, was immediately cordoned off with temporary fencing and access securely restricted.

Today Monday 1 December 2025, all asbestos-containing materials will be safely removed from the site by a licensed asbestos contractor. Timber sleepers will also be installed to seal the fence line to prevent any fragments washing over in future.

All works will be carried out after 3.30pm when no students are onsite.

Once remediation works are completed, the area will be tested by an independent hygienist using air monitoring. Once it is confirmed that the area can be reopened, usual school activities will resume.

All work will be done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures will be in place while work is being done. All work will be completed by licensed asbestos contractors and will be inspected by independent hygienists.

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

We will keep the community updated.

Thank you for your cooperation during this important work.
