

Toormina Public School

Works Notification | September 2026

Dear staff, parents, carers and neighbours,

We are writing to provide you the latest information on the project underway at the neighbouring Toormina High School, and what it means for Toormina Public School.

This update is part of regular communications with details about what we are doing, when we are doing it and how we are minimising disruption on school operations.

Latest project update

In 2021, Toormina High School sustained damage to buildings during a significant hailstorm. Following the completion of insurance assessment and planning, a full roof replacement is set to begin.

As outlined [previously](#), we have undertaken significant works on building AG (Agriculture Science rooms) to remove old roofing, ceilings, wall panels and fixtures.

The tender for works to refurbish building AG has now been awarded. Construction will soon commence and will include:

- Replacing the roofing material
- Installing new ceiling linings
- Installing new eaves, gutters, stormwater connection and downpipes
- Replacing existing lighting to LED

There is no construction work taking place at Toormina Public School. This notification is to keep you informed about the activity next door and to explain one area where the two schools are working together during the project.

Use of Toormina Public School's oval

As part of this project, more than 20 demountable classrooms have been installed alongside the western and southern sides of the high school oval to make sure school operations continue uninterrupted throughout the project.

While demountables occupy this oval, Toormina High School students are making use of Toormina Public School's oval for sport and recreation. We are committed to ensuring this arrangement has as little impact as possible on our students. Timetabling is managed in close coordination with both schools, and any changes to arrangements will be communicated to you in advance.

Upcoming school holiday works at Toormina High School

We are aiming to complete service trenching works for the demountable classrooms these school holidays. As a standard precaution for any works of this nature, the excavation will be carried out

Email: schoolinfrastructure@det.nsw.edu.au
Phone: 1300 482 651
schoolinfrastructure.nsw.gov.au

under strict controls to protect the health and safety of contractors, students, staff, neighbouring properties and the broader community.

These controls include continuous air monitoring, supervision by an independent hygienist, the use of a licensed asbestos removal contractor, clear signage and a designated exclusion zone around the work area. These measures ensure the work is carried out safely, with no risk of exposure to anyone on or near the school site.

We will also begin the refurbishment of building AG during this holiday period. These works are expected to take 12 weeks.

Managing construction impacts

The high school will continue to play a central role in making decisions throughout the process and will continue to guide each step moving forward. All work will be carried out in consultation with school leadership to ensure there is no disturbance to students sitting their HSC exams.

During the work, including provisioning such as plumbing and electrical works for the demountable installations, there will be construction noise due to the use of heavy machinery. Some noise and traffic disruption may be experienced in the vicinity of the school and neighbouring properties. For more information about how we manage construction impacts, please visit our [webpage](#) or scan the QR code.

Working hours

All site works will be undertaken in accordance with departmental and school operating constraints and procedures. All works will be undertaken in accordance with NSW Environment Protection Authority guidelines.

Keeping you informed

We will keep you updated throughout this project.

If you have questions about this work, please contact us on the details below.

Thank you for your cooperation while we deliver this important project for the Toormina High School community.
