

Valley View Public School

Completion pack – September 2025

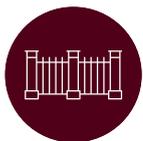

Welcome to your improved infrastructure

There are 3 new retaining walls for Valley View Public School that are finished and the area has been cleared for use. This project delivered:

3 retaining walls repaired and rendered to National Construction Code and Australian Standards

new fencing, handrails and wall capping to provide a layer of protection at the top of the wall

replaced brickwork with concrete blocks on the retaining wall between buildings B and E

structural inspection including removing outside brick veneer

balustrades

New retaining wall

New retaining wall and balustrades

Message from your Principal

We have 3 new retaining walls for our school community, improving the structural integrity of our infrastructure.

The new retaining walls were built to further stabilise boundaries around high-traffic areas, increasing accessibility and safety for our students and staff.

During construction, these areas were secured with temporary fencing which has now been removed giving more space back to students and teachers when moving between buildings B and E, E and F, and in front of Building F.

I would like to thank our school community for their patience during construction while the retaining walls were built.

Kirsty Squires

Principal

Valley View Public School

Thank you

Thank you for your patience during the removal of existing materials and construction of the new walls.
