

Northlakes High School

Works notification | 31 August 2023

Dear staff, parents and carers,

The Department of Education installed new and efficient LED lighting at Northlakes High School between July 2022 to January 2023.

School Infrastructure NSW was recently advised by the school of a light fitting that became dislodged in Building J Room R0003.

We investigated this, and it was found the contractor has used a fixing method different to the established work practices for the program.

An inspection of all recently installed LED lights was arranged as quickly as possible and rectification work has been completed where required.

The contractor has also been contacted to ensure the appropriate corrective actions will be taken in the future to prevent a reoccurrence.

All work was scheduled in close consultation with school leadership to minimise impact on students and staff.

Thank you for your understanding. For more information, please contact School Infrastructure NSW via the contacts below.
